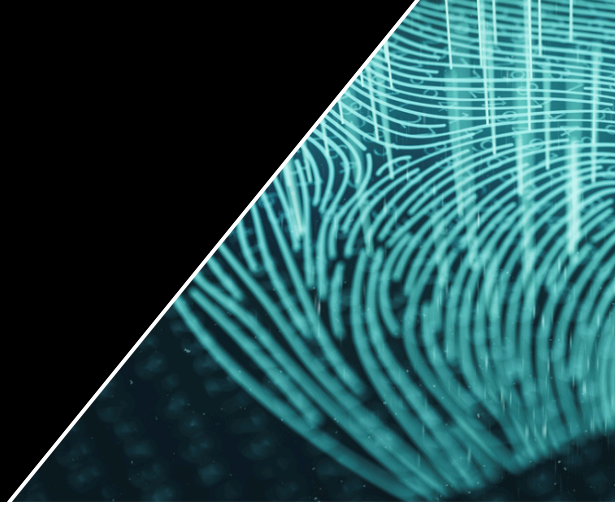
ARANCIA

IDENTITY SECURITY SOLUTIONS

Securing Every Identity. Governing Every Access. Human and Non-Human.



Identity Security In an Increasingly Connected World

Identity has become a primary attack surface as organizations accelerate cloud and SaaS adoption, enable remote work, and embrace automation and AI. With traditional perimeter-based security no longer sufficient, protecting access to critical systems and data has become increasingly complex.

As human and non-human identities multiply across interconnected environments, organizations face growing challenges in maintaining visibility, managing privileges, and enforcing appropriate access controls.

Compromised credentials, excessive privileges, and fragmented identity management create security gaps that attackers can exploit, increasing the risk of data breaches, operational disruption, and compliance failures.

The Growing Impact of Identity Security Gaps

39%

of breaches involved credential abuse at some point in the attack

Verizon 2026 DBIR

246 DAYS

average time to identify and contain breaches involving compromised credentials.

IBM 2025

50%

of surveyed security leaders reported incidents or breaches linked to compromised machine identities.

CyberArk 2025

As Identity Environments Become More Complex, Organizations Face IAM Challenges Driven By:

- **Credential theft and phishing attacks**
- **Fragmented identity stores across cloud and on-prem environments**
- **Excessive and unmanaged privileges**
- **Limited visibility into privileged and non-human identities**
- **Increasing cyber insurance, regulatory and audit requirements**

ARANCIA

From Identity Complexity to Greater Control

Effective identity security goes beyond authentication and access provisioning. It requires a coordinated approach to managing identity lifecycles, enforcing least privilege, detecting identity-related threats, and maintaining continuous oversight of access. **Arancia helps organizations address these challenges through end-to-end Identity & Access Management solutions,** combining strategic advisory, implementation, governance, and managed services to strengthen security, simplify operations, and reduce identity-related risk.

Our Identity Security Solutions

IAM Strategy & Roadmap

- Identity Risk Assessments
- Identity Modernization Plan
- Zero-Standing Privileges (ZSP) Adoption
- Identity Control Mapping Aligned with NIST CSF
- 2.0 and Zero Trust

IAM Implementation & Integration

- Identity Providers, Phishing-Resistant MFA, SSO, SCIM
- Passwordless and Biometric Authentication
- Identity Security Posture Management (ISPM)
- Guardrails for NHIs and AI Agents

Privileged Access Management (PAM)

- Credential Vaulting and Rotation
- Session Management, Vendors and 3rd-Party Access
- Full Visibility, Monitoring and Intelligence
- Endpoint Privilege Management, Removal of Local Admin Rights
- Zero-Standing Privileges, Just-in-Time (JIT) Access

Identity Governance & Administration (IGA)

- Identity Lifecycle Management (JML - Joiner / Mover / Leaver)
- Birthrights and Role-Based Access
- Access Requests, Approval Workflows, Self-Service
- Access Reviews and Certifications
- AI-Augmented Role Mining and Tailoring
- NHIs and AI Agent Governance

Certificate Lifecycle Management

- Certificate Renewal Automation
- Public and Private CAs
- Discovery and Onboarding
- Post-Quantum Computing (PQC) Readiness

Identity Managed Services

- Identity Platforms Operational Administration (IAM, IGA, PAM)
- Privileged Account Onboarding and Monitoring
- Continuous Policy Tuning
- Identity Security Posture
- Access Management and Review
- Compliance Reporting and Audit Support
- Custom Integration Development

Why Partner with Arancia

- Deep Identity expertise rooted in real-world breach scenarios
- Partner with Market Leaders on Identity
- Proven experience in regulated and OT environments
- Focus on making IAM operational, measurable, and sustainable

We do not just deploy IAM, IGA and PAM.
We make identity security work.

Arancia is a technology-led cybersecurity company delivering a full suite of services in the domains of Offensive Security, Compliance & Assurance, IAM, Product Implementation & Support, Incident Response, NOC, and Managed Security Services. We deliver comprehensive cybersecurity, cloud, and technology solutions, including DarkSense, Arancia's advanced Next-Generation SIEM and TDIR platform built for proactive detection, intelligence-driven response, and continuous improvement in security posture.
